*Made
to belong.*

A space to
admire.
A place to
train.

Training starts with design.

Your training, your home's character and the outdoors come together in one structure. NEXUS offers eight starting points for a design of your own.

For a private home

Quiet lines, integrated storage and a fit with the outdoor architecture.

For a premium outdoor club

A sequence of stations and movements built around the user experience.

OUTDOOR / FUNCTIONAL

PORTAL

THE SOFT FRAME

01

Training becomes part of your home.

Experience

A light palette with enclosed side storage

Training

Dual cables, rings and ladder

Form

Soft frames and two training zones

IVORY / CHAMPAGNE

LINEA

THE TRAINING LINE

02

One line. Three training worlds.

Experience

Separate stations along one shared axis

Training

Bar and bench, punching bag and dual cables

Form

Linear layout and straight lines

GRAPHITE / OAK TONE

VELA

THE GARDEN STUDIO

03

Your private studio moves outdoors.

Experience

Warm tones and an open frame

Training

Dual cables, bench and ladder

Form

Soft uprights and slatted shading

TERRACOTTA / WARM STONE

ATRIUM

THE OPEN COURTYARD

04

An open courtyard. Training around you.

Experience

Distinct strength and movement zones

Training

Bar and bench, cables, rings and ladder

Form

Three wings around an open centre

SAGE / GRAPHITE

DUET

THE CONNECTED PAIR

05

Strength and movement in connected wings.

Experience

An open ring-training area between stations

Training

Bar and bench, cables, rings and ladder

Form

Two volumes joined by a training bridge

NAVY / STONE

ARCUS

THE SCULPTURAL SIGNATURE

06

An architectural arch. Personal training.

Experience

A sculptural presence with soft lines

Training

Dual cables, rings, bench and ladder

Form

Bronze arches and an inner training frame

BRONZE / CHAMPAGNE

A closer look

TRIAD

THE MOVEMENT HUB

07

Three arms. Freedom to move.

Experience

Oval uprights with a separate attachment interface

Training

Rings, dip bars, ladder and punching bag

Form

Three directions around a storage core

FOREST / BRASS TONE

RESERVE

THE PRIVATE CLUB

08

Your private outdoor club.

Experience

An expansive concept with integrated storage

Training

Bar, cables, rings, ladder and boxing

Form

A shaded wing and an open movement wing

CHAMPAGNE / ESPRESSO

A closer look

Beauty is also in the connections.

Each part has a purpose. The outer frame defines the architectural character;
the working uprights and interfaces are designed around the chosen attachments.

Oval casing

Freedom of form around the working frame

Rounded casing

A soft edge and a clean architectural line

Working upright

Flat faces for attachment interfaces

03 / Space to move

Station positions consider the body's path,
attachments, circulation and storage.

02 / Visible connections

Connect the frame and casing while retaining
access to attachments and height adjustment.

01 / Defined interface

Profile size, hole pattern and locking system
are selected with the attachment family.

Design principles only. Final sections, connections and dimensions are defined in detailed design.

ARCUS

An arch outside. Precision within.

A soft arch wraps a training system
with straight lines.

01 A bronze outer frame creates a distinct
silhouette.

02 Dark working profiles and visible joints
make the structure easy to read.

03 Cable housings continue the warm tone
and reduce exposure of the mechanisms.

THE COMPLETE CONCEPT

The same visualization, viewed closer.
Details continue the language of the whole structure.

Concept page

RESERVE

A place for every attachment.

Storage and cable mechanisms integrate
into the training wall.

01 Separate cable housings with working rails
at the front.

02 Accessible shelves and closed fronts share
one finish language.

03 Detailed storage design adapts closure,
ventilation and access to the chosen equipment.

THE COMPLETE CONCEPT

The same visualization, viewed closer.
Details continue the language of the whole structure.

Concept page

Beyond the workout.

Part of the outdoors, even between workouts.

Your bespoke design

Frame and finish

Tailored to location, exposure and maintenance.

Portable equipment

Dedicated dry storage and a place to tidy up
after training.

Service access

Access to locks, rails
and mechanisms.

The outdoor specification addresses shade, drainage, anchoring, training surfaces, mechanism protection and storage. Portable equipment needs appropriate usage and storage guidance.

Concept slats illustrate partial shade. Rain protection is specified separately.

One collection. Different characters.

Colours connect training with the architecture of your home.

NEXUS BY SPARTA | EUROTEC

[Back to the collection](#)

Concepts, not manufacturing specifications. Dimensions, attachment compatibility, materials, anchors, loads, movement and safety clearances, and outdoor suitability require detailed design and professional checks. Colours and attachments may vary by project.
